

Dear Brian

I thought I would take a few minutes to give you feed back on your new programme.

To start with I was a bit cautious whether your mentoring programme would give me a good return on investment and if I could even afford it. I laugh now because I couldn't have been more wrong.

When we started I was going through a lean time and work wasn't as good as it should be. Although I have over 20 years working in a top Advertising Agency my business has not been as successful as I have wanted it to be.

After the first couple of sessions I noticed my energy soar and a significant change in mindset that started to attract business.

After only two months I was able to turn what would normally be a £300 job into a £5000 project without thinking about it. I then did this again shortly after - turning another £300 job into £3000. I did this almost automatically with no effort. Before the programme I would've accepted the £300 and done the job asked for. The amazing thing is the clients are MUCH HAPPIER than if I had just done what they asked.

What I am most excited to talk about is how I am changing inside by removing all the inner obstacles that were holding me back. And feel for the first time that I am taking my business forward in a way I never thought possible before working with Advanced Mind.

We have already doubled our fees and have attracted clients of a much higher value and all in such a short time.

I have known and been approached by a few business coaches but this is nothing like anything I have ever seen or experienced before. And I am really excited about the next few months and how things are unfolding.

Please feel free to show this letter to anyone considering taking up your offer and working with Advanced Mind. It's the least I can do.

Regards,

Jim Divine
